Satellite Internet - Reconecta

@TurismoCuida

Objective

Satellite Internet

To bridge the digital gap in highland andean communities of Peru, by implementing high-speed internet that contributes to strengthening education, promoting the commercial link of local products, and raising awareness about the current reality in key areas.

Challenges

Satellite Internet

- Digital gap in communities.
- Loss of learning opportunities.
- Entrepreneurs unable to consolidate their businesses due to lack of connectivity.
- Students unable to consolidate their learning with digital tools.

Beneficiaries

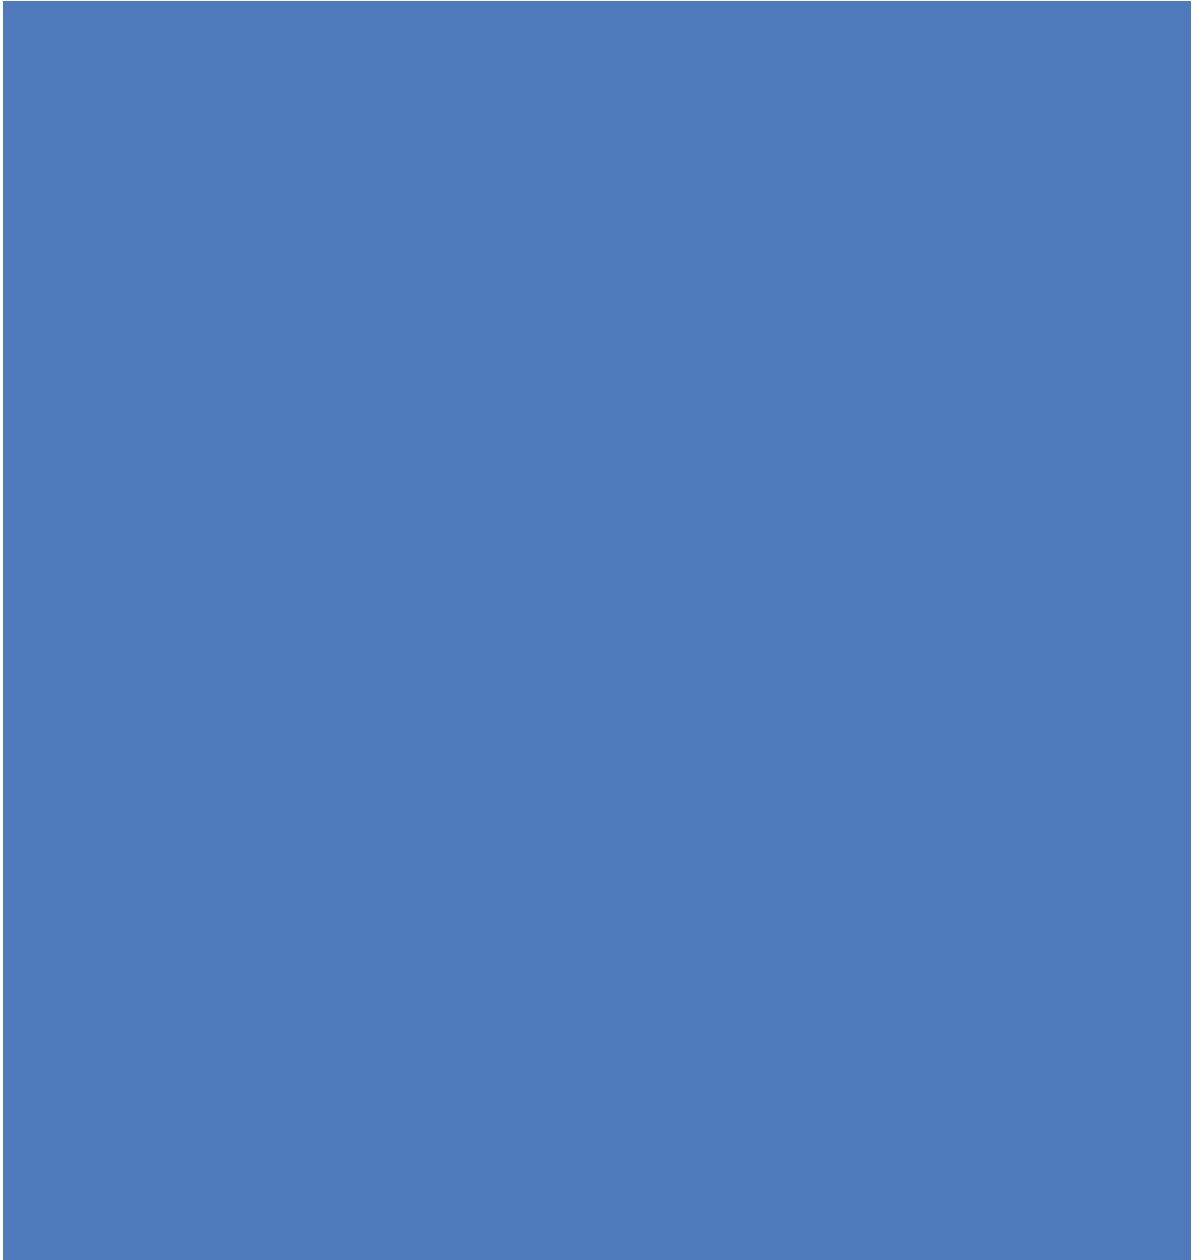

Satellite Internet

- Highland andean communities without internet or access to cellular phone service.
- Prioritized rural sectors with low economic income.
- Community members with initiatives related to tourism and handicrafts.
- Primary and secondary school students.

Activities

Satellite Internet

- Meetings with the community board to establish a work agreement.
- In-depth interviews with key community members to identify territorial issues.
- Community assemblies to build educational proposals.
- Purchase of equipment and installation.
- Monitoring and support during implementation.

Results

Satellite Internet

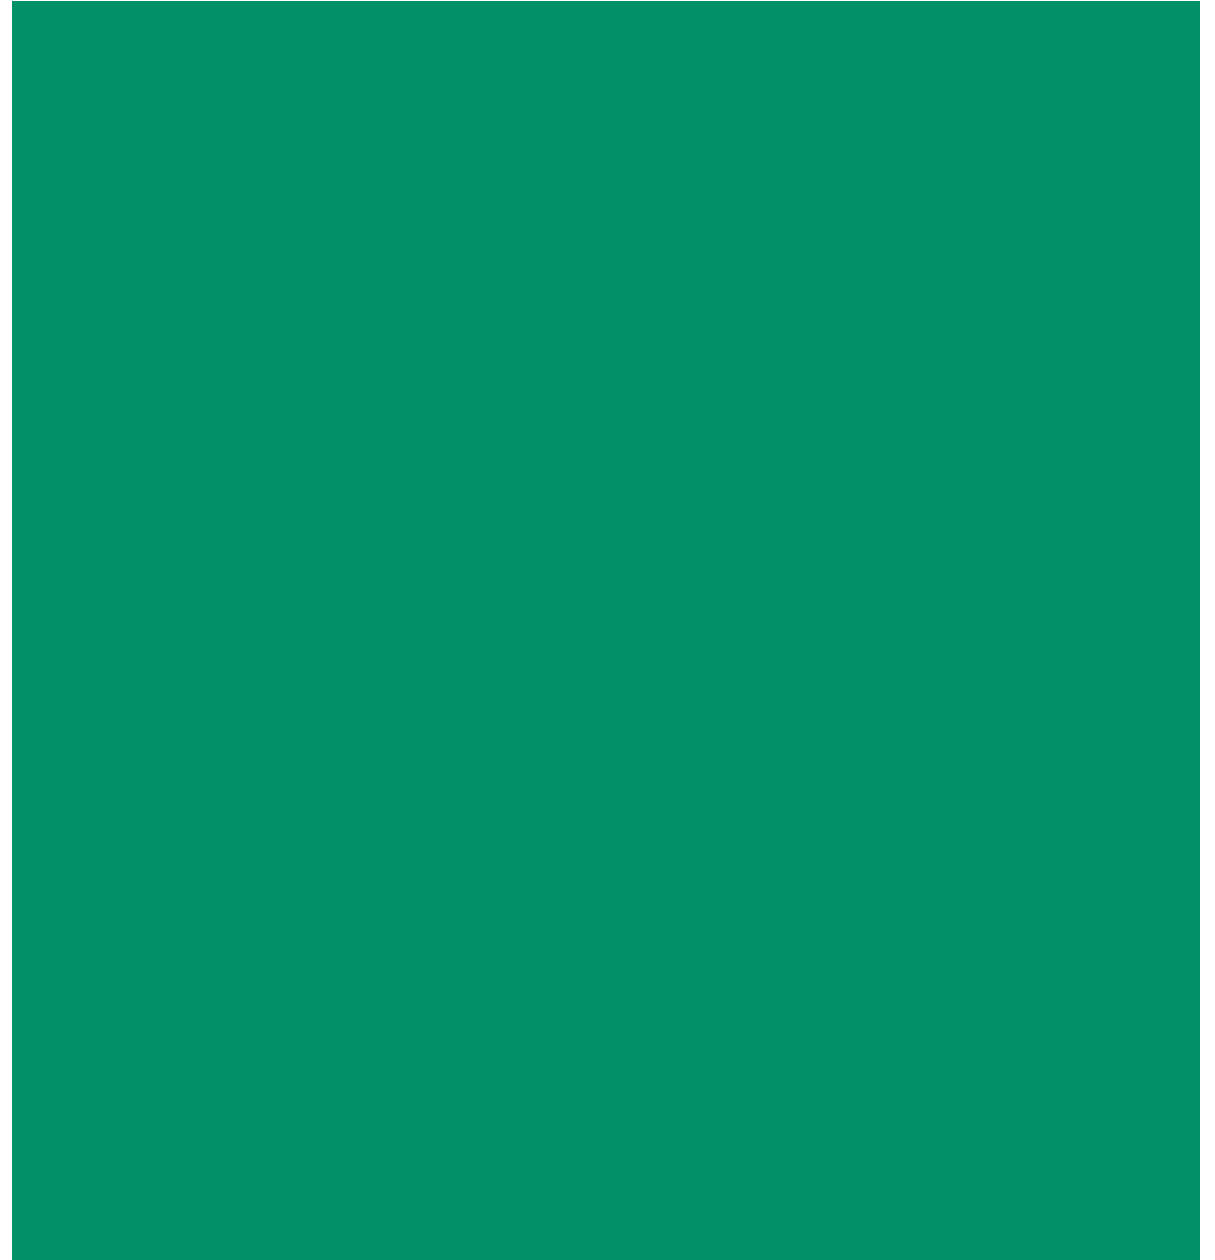

- Homes and community centers with internet connection
- Reduction of the digital gap, decreasing inequality
- Access to educational platforms for primary and secondary school students.
- Development of digital skills and use of online tools.
- Possibility of telemedicine in health centers.
- Growth of small businesses.

Indicators

Satellite Internet

- % of households connected in the community.
- % of geographic area covered by internet service
- Service availability rates based on the number of hours.
- Number of active members using the service
- Number of users accessing educational platforms online.
- Number of people trained in using the internet
- Perception of the impact on quality of life after the service arrival.
