Intangible Cultural Heritage

Historic Casa Hacienda Sojo

The project revitalizes the historic Casa Hacienda Sojo, which is over 115 years old. With an investment of **USD15,290.00** the focus is on restoring the three arches of the loggia on the upper terrace located on the main façade. This monument was declared a Cultural Heritage of the Nation in 1974. The restoration will not only preserve its architectural value but also enhance the tourist experience, attracting visitors and boosting the local economy through the creation of new cultural and tourism services in the Piura region. In partnership with the Cultural Association Sojo, Turismo Cuida promotes heritage conservation and sustainable development.
